

Setu™ Family

HermanMiller

As the ways you collaborate evolve, your furniture needs to evolve too. Designed by Studio 7.5, Setu offers an extended range of chairs, stools and tables for all the ways you work, meet and relax. Ideal for shared spaces, Setu responds to your weight as you sit down, flexing around your contours to support every body in comfort – no adjustment needed.

The core of Setu is the Kinematic Spine, a combination of two simple polypropylene materials that are precisely engineered to achieve instant comfort. You are fully supported the moment you sit down, and the spine bends and flexes to your every move. With no tilt mechanism and only one adjustment (height), chair components are minimised.

7.5

The Setu family is designed in partnership with Herman Miller by Studio 7.5 from Berlin, Germany. The same team responsible for the ground-breaking ergonomic chair, Mirra.

“Beauty is not only what you see,  
it’s also what you feel.”

Studio 7.5

Instant comfort for anyone, anywhere.

Less materials, more to love.

Responsive design, versatile style.

At home in the office. The office at home.

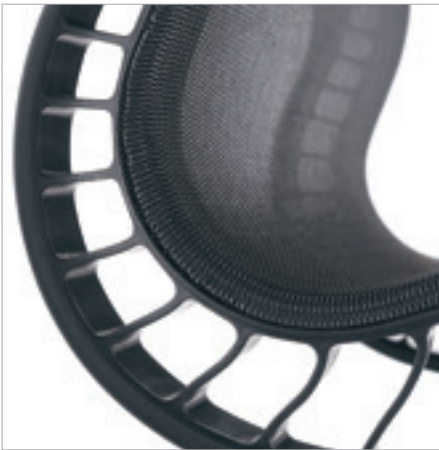

## Design for the environment.

With just a few parts, an uncoated base and a weight of 8kgs for the multipurpose chair, Setu is made with minimal time and energy, giving you more to love.

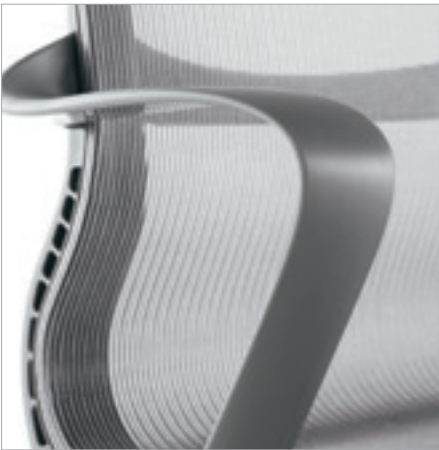

- Multi-purpose chair: 93% recyclable / 45% recycled content
- Lounge chair: 90% recyclable / 51% recycled content
- Work Stool: 90% recyclable / 51% recycled content
- Table: 65% recyclable / 84% recycled content
- No PVC
- MBDC Cradle-to-Cradle™ Silver, GREENGUARD®, and Level™ 2 Certified.

## Materials Innovation.

Kinematic Spine

The polypropylene spine is a combination of two bendable composite pieces connected by “spokes.” The spine accounts for the sitter’s weight, providing the correct tilt tension without any mechanisms or adjustments.

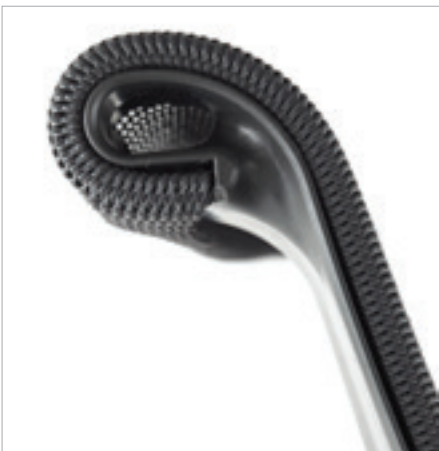

Ribbon Arm

Strong and supportive, Setu’s simple, one-piece arm curves gracefully around the back.

Kinematic Edge, C-Layer Suspension

The Kinematic Edge and C-Layer suspension are unique to the Setu upholstered chair, connecting with the Kinematic Spine to provide a similar level of comfort and support to Lyris. C-Layer suspension colour match the selected frame.

Lyris Suspension

Lyris is a finely tuned elastomeric material designed to provide superior suspension as well as aeration and temperature control. It works with the Kinematic Spine to distribute your weight evenly and conform to your contours.

Graphite Base

This graphite base enhances the aesthetic range of Setu and delivers a greater range of specification options.

H-Alloy™

The H-Alloy aluminium base is durable and anti-corrosive. The H-Alloy base is also available with the upper surface polished to provide a more premium aesthetic option.

Chair Materials

Table Materials

From the composite Kinematic Spine, to the elastomer seat suspension, to the H-Alloy aluminum base that requires no finish, Setu provides elegant, dematerialized design.

Honesty and innovation in materials are hallmarks of Setu. Every detail is driven by function.
