Public Office Landscape

Based on the belief that the more people connect, the better they work, Public transforms every part of the office—including individual desks—into places for collaboration. It's the first office system to support casual work and to provide comfort at the desk, in circulation spaces, and in group areas—all within a consistent design vocabulary. Visually uniform and modular surfaces, storage, and seating can be configured into a broad range of settings that encourage fluid transitions between collaborative and focused work.
