

hush

Chair

Design

The Hush chair's wingback form offers sanctuary and a welcoming familiarity. Whilst Hush takes inspiration from the past it responds to contemporary demands. Hush is designed to be comfortable but with an upright positive sit; making it an ideal retreat but perfect for working, reading eating or private conversations. The slender internal frame provides the Hush chair's now unmistakable profile; it is a cost effective product that makes a big statement every time.

Technical

The main body of the Hush chair is constructed with moulded plywood and CMHR foams. Base options are constructed from mild steel and finished with hard wearing polyester powder coat. The wooden base is constructed from turned hardwood and finished with a matt lacquer.

*All dimensions quoted are rounded to the nearest 5mm or nearest 1/2 inch.

Other Options

2 Tone Upholstery

High Arms

Hush chair designed by naughtone

general manufacture description

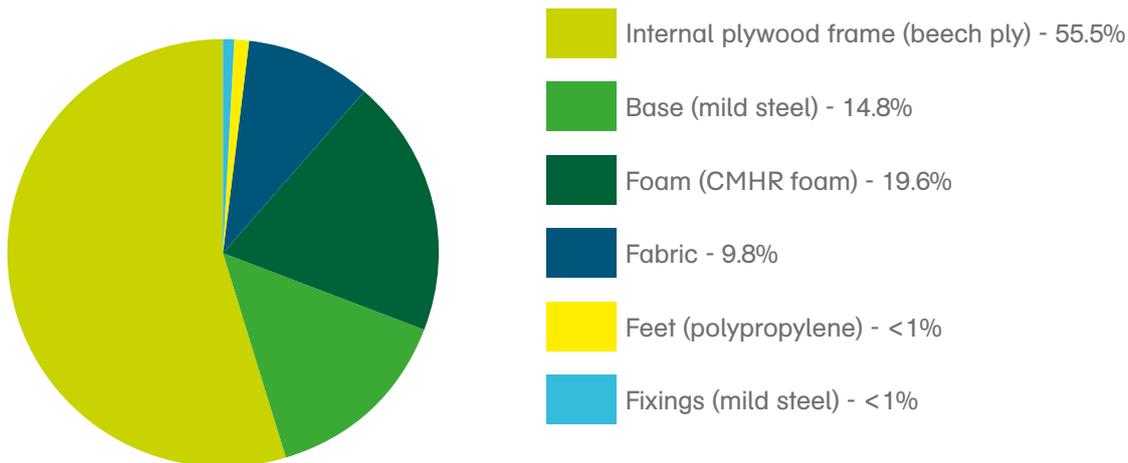

The Hush chair innershell is constructed from 1 solid moulded plywood form. The frame is then covered with CMHR foams and fully upholstered over with fabric. The Hush shell and base is assembled together with dry fixings and the upholstered shell can be easily broken down into separate materials with hand tools.

The Hush chair sled base is machine bent from mild steel rod, then weld jointed together and hand polished to a smooth surface. The steel rod is then finished with either chrome plating or polyester powder coat.

general manufacture description

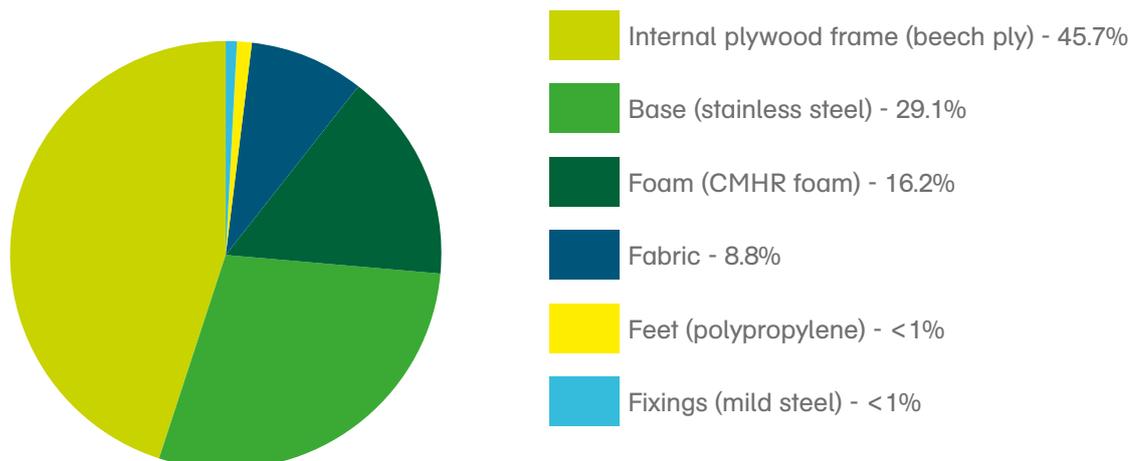

The Hush chair innershell is constructed from 1 solid moulded plywood form. The frame is then covered with CMHR foams and fully upholstered over with fabric. The Hush shell and base is assembled together with dry fixings and the upholstered shell can be easily broken down into separate materials with hand tools.

The Hush chair swivel base is cut from mild steel plate and mild steel tubing. A separate swivel mechanism is pressed into the top of the tube before the top plate is attached. The components can be separated with hand tools for end of life recycling. The base is then finished with either chrome plating or polyester powder coat.

general manufacture description

The Hush chair innershell is constructed from 1 solid moulded plywood form. The frame is then covered with CMHR foams and fully upholstered over with fabric. The Hush shell and base is assembled together with dry fixings and the upholstered shell can be easily broken down into separate materials with hand tools.

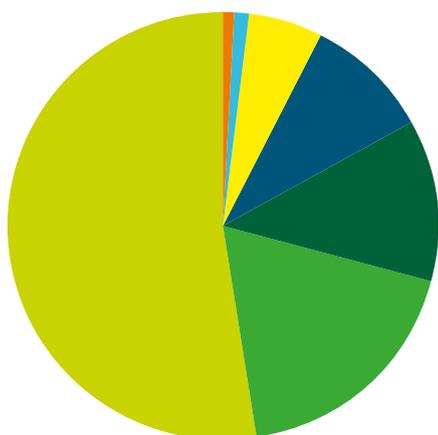

The Hush chair wooden legs are turned from square blocks of sustainable solid oak. The Oak is sealed with spray matt lacquer. The oak legs have a mild steel subframe which is fabricated and welded together from mild steel bar and mild steel tube. The subframe is finished with a powder coat finish. The subframe and oak legs are assembled together with dry fixings and are easily separated for end of life recycling.
